

Here's the Science:

The effect of addictive substances on the teen brain.

This presentation will use actual PET images to show how alcohol, vaping, marijuana, drugs, and prescription medications affect the developing adolescent brain.

Learn the science to help you in your role as a parent!

Presenter: Dr. Dewey, Ph.D, Manager, MicroPET Core Facility, Feinstein Institute for Medical Research, Northwell Health Manhasset, NY. Dr. Dewey is a renowned neuroscientist whose research has been featured on ABC, NBC, CBS, FOX, CNN and in The New York Times.
